Who we are!

Advanced Business Technology is a well-established IT Service and Solution provider in Qatar.

Advanced Business Technology offers a comprehensive range of capabilities. The company has diversified business solutions in the IT field. We provide a wide range of services such as Structured Cabling, Networking, Maintenance, AMC, Telephone Systems, CCTV, PA systems, Video systems, and many more. We have the capability and experience to support various business clients such as Government, Private, or any other SME organization.

Our Mission

We are dedicated to helping our clients to run their business more efficiently, supporting them to gain greater insight into their business activities, and providing them with lasting benefits by automating their business processes.

Our team consists of devoted, highly skilled professionals who are equipped with vast experiences in Computer Servicing, Trouble Shooting, Data Migration, Integration solutions, and Network Management.

Advanced Business Technology is confident in providing IT services for small, medium, and large organizations that help them to achieve their goals.

Our Vision

Our vision is to be considered the best IT solutions and services company by our customers, partners, and employees. We strive to achieve this through innovation, quality, and commitment to first-class service.

To realize this vision, we base our business on the following principles:

Customers – we aim to provide business value and build strategic relationships with our customers based on trust and loyalty through outstanding quality, value, and service.

Partners – we aim to work with our partners with total integrity and to add value to their business through the quality and intimacy of our relationship with our customers.

Our Services:

- Structured Cabling & Networking
- Audio/Video & Public Address
- LED Display & Digital Signage
- CCTV & Surveillance Systems
- Access Control & Time Attendance
- Telephone Systems
- IT Maintenance Services
- IT Personnel Outsourcing Service
- Computers & Peripherals

Structured Cabling & Networking

Advanced Business Technology specializes in the design, installation, and service of structured wire cabling systems that support multi-product, multi-vendor telecommunications networks. At Advanced Business Technology, we understand the dynamic nature of modern technology and how it impacts your business. We'll meet with you to assess your company's current and future networking requirements, educate you on the latest structured wire cabling technologies, explain your options and design a high-quality, cost-effective cable system that works for you.

In conjunction with our proven project management techniques, we create high-quality, cost-effective structured cable systems that support a company's mission-critical applications of today, while affording them the bandwidth to migrate to tomorrow's emerging technologies.

After we install, test, label, and certify your cable system, we will provide you with a complete documentation package, including patch panel records, test results, and as-built drawings, to help facilitate the future move.

Audio/Video & Public Address

Audio & Video systems:

Our main AV goal is to ensure that the solution we provide meets the needs of the end-user. We aim to provide high-quality audiovisual equipment, professional installation, competitive pricing, and excellent customer service.

Our team can incorporate many aspects of an AV system, as this may include a ceiling mounted high definition projector, motorized projection screen, sound system solution, or paging system.

PA and Sound Systems:

In today's world, PA systems are essential for mass communication and emergency notification. PA system installations must work with multiple inputs and sources and provide a quality sound to all the PA's intended coverage area. A good PA system installation minimizes spill and reflection and the PA system is more efficient and clearer.

LED Display & Digital Signage

LED Video Walls:

A seamless display is scalable to any size or shape with excellent optical characteristics that look great from any angle. With advanced technology and design innovation, our LED video wall solutions meet the needs of any LED video wall customer.

LCD Video Walls:

Best-in-class LCD video walls with a wide range of sizes, resolutions, and technologies. Featuring the narrowest bezels, the most flexible mounting systems, and slimmest installation depths.

Large Format Displays:

A full roster of large format LCD displays featuring brilliant image quality and professional reliability. The flat panel displays are the ideal complement to any retail store, conference room, lobby, control room, or other professional applications.

Digital Advertising & Interactive Displays:

A wide variety of Digital advertising displays and kiosks. comes in different shapes and functions. you can choose between touch and non-touch displays, Floor or wall mount, Windows or Android operating system.

CCTV & Surveillance Systems

CCTV has become a standard requirement for more and more businesses seeking to comply with Health & Safety requirements. When you want to protect your business from vandals or keep an eye on multiple areas at once, a Video Surveillance System is the perfect solution. The ability to monitor several locations simultaneously is a priceless commodity.

Surveillance camera technology has improved drastically over the past few years. We partnered with the best CCTV manufacturer to provide your company with quality products and services. Our professional and reliable service will have your business safe and secure using the finest security camera systems in the industry.

We offer a comprehensive selection of video security cameras and installation. Each video security camera has a specific use, designed to meet the unique needs of virtually any video surveillance application - and any budget. from single cameras to multi-level surveillance and remote management. Find the video security cameras that are perfect for your needs. Feel free to contact us for advice and a quote.

We specialize in IP-based and analog surveillance systems and are proud to be partners with the best manufactures of CCTV.

Access Control & Time Attendance

Biometric time and attendance systems are becoming increasingly popular with organizations as they are a simple way to stop what is known as 'Time Theft' which includes buddy clocking where one employee clocks in for another. Biometric devices can also be used when a greater level of access control is required. Biometric systems include fingerprint, hand, face, voice, and devices that read the iris pattern in an eye.

Biometric clocking devices deliver accurate time and attendance data in real-time for payroll and operations.

We offer a range of wired and Wi-Fi biometric devices that suits your business needs.

Telephone Systems

In today's business world, you have to be efficient to make it. Communication is a vital necessity for every industry. We understand one solution doesn't fit all and that's why we have partnered with multiple phone manufacturers to have options available to fit your specific needs. From small systems to large systems, we have the experience and partnerships to provide you with a phone system that is right for your company.

We know reliability is your first and foremost consideration. Other variables we consider when tailoring a telecommunications package includes cost, ease of use, migration paths, and your unique business needs. As you decide what phone system package works best for your company, it is important to have professional help during selection, installation, and maintenance, in order to ensure proper performance, best results for your needs.

IT Maintenance Services

We aim to help businesses and offices as a partner, through our continuous and diligent dedication to providing the highest quality of service. In order to achieve integration of what we offer to our customers, we added to our package the maintenance support services.

Whether you need a regular service agreement or occasional emergency help-desk support, we have the service that will suit your business.

AMC (Annual Maintenance Contract):

Is it so important to maintain efficiency & smooth operations in a business? Of course yes, it's not only important but mandatory too. Maintaining continuous flow and effective business is merely the toughest job.

Your business may belong to any sector such as Government, Private or any other SME organization and with IT Annual Maintenance Contract Services (IT AMC Services) we will help you to acquire well-maintained infrastructure along with highly qualified, competitive strong assistance meeting respective business standards.

IT Personnel Outsourcing Service

From pay-as-you-go, IT support services, Part-time to fully outsourced IT, if you have 20 -2500 users we can provide your IT support, management, and strategic direction. Whether you need just a bit of support for your IT team, specialist expertise to call upon, or a fully managed IT service, we can deliver.

If you need to extend the capability and capacity of your in-house team, then our flexible pay-as-you-go services will be there for you on that high-end support call where you need a specialist, including round-the-clock systems monitoring, 24x7 Technical Service Desk, 3rd line expertise, and regular system administration.

Our Fully Managed Service, specifically designed infrastructure outsourcing for any organization, is a blend of professional, process-driven IT management and support with a more personal and flexible approach to service delivery.

Closer alignment between IT and the business is what we all strive for. Our Strategy development service gives you just that. Our aim is to help our customers build a deliverable plan for developing their IT in line with their corporate business objectives.

Computers & Peripherals

We can supply the following:

- Desktop computers, laptops and accessories.
- Printers, photocopiers, fax machines and scanner.
- UPS & power management devices.
- Peripherals & computer parts.
- Wired and wireless networks devices.
- Computer monitors.
- Projectors & projectors screens.

Partners & Brands

By partnering with the world's leading technology providers we have become one of the well-known IT companies in Qatar.

If you are looking for a partner with experience, technical expertise, and a close focus on quality, integrity, and client relationships, then Advanced Business Technology is your perfect choice.
